

Spirit and Space Construction Update

IN PICTURES! 

Finished! Our beautiful new Chancel in the Sanctuary is now complete!

We have new liturgical furnishings (communion table, pulpit, baptismal font) being built by Erich Thompson, the designer of our cross, so for now are using the table and font from our Chapel, and the pulpit is the one from when the church was built in 1871!

Work is now underway on our new main office making it much more accessible and welcoming from the parking lot. An opening was cut out for a new interior window to increase visibility. These are some pretty thick walls!

Our new Sacristy to hold all of our Liturgical elements now located behind the Chancel.

The elevator opening at the parking lot entry landing was cut out and the landing is being expanded by pushing the stairs to the lower level out a couple of feet.

A new entry to West Hall is being created to make room for the elevator landing on the main level. The old doors will be removed so guests will have a clear view to the new Main Office.

New lighting and landscaping in our parking lot and entrance make for a beautiful and welcoming entry to CPC!
